# sys·tem

**sys·tem** (sɪs'tem) noun

Abbr. **syst.**

1. A group of interacting, interrelated, or interdependent elements forming a complex whole.
2. A functionally related group of elements, especially:
  - a. The human body regarded as a functional physiological unit.
  - b. An organism as a whole, especially with regard to its vital processes or functions.
  - c. A group of physiologically or anatomically complementary organs or parts: *the nervous system; the skeletal system.*
  - d. A group of interacting mechanical or electrical components.
  - e. A network of structures and channels, as for communication, travel, or distribution.
3. An organized set of interrelated ideas or principles.
4. A social, economic, or political organizational form.
5. A naturally occurring group of objects or phenomena: *the solar system.*
6. A set of objects or phenomena grouped together for classification or analysis.
7. A condition of harmonious, orderly interaction.
8. An organized and coordinated method; a procedure. See synonyms at *method.*
9. The prevailing social order; the establishment. Used with *the*: *You can't beat the system.*

[Late Latin *systēma*, *systēmat-*, from Greek *sustēma*, from *sunistanai*, to combine: *sun-*, *syn-* + *histanai*, set up, establish.]
